

JOB DESCRIPTION: CONSULTANT CLINICAL PSYCHOLOGIST, PREVENTION OF VIOLENCE AGAINST WOMEN AND CHILDREN

ABOUT SNEHA

A secular, Mumbai-based non-profit organisation, SNEHA believes that investing in women's health is essential to building viable urban communities. SNEHA targets four large public health areas: Maternal and Newborn Health, Child Health and Nutrition, Adolescent Health and Sexuality, and Prevention of Violence against Women and Children.

SNEHA recognises that, in order to improve urban health standards, our initiatives must target both care seekers and care providers. We work with communities residing in informal settlements to empower women and communities to be catalysts of change in their own right and collaborate with existing public health systems and health care providers to create sustainable improvements in urban health.

ABOUT THE PROGRAM ON PREVENTION OF VIOLENCE AGAINST WOMEN AND CHILDREN

SNEHA's Program on Prevention of Violence against Women and Children (PVWC) aims to develop high-impact strategies for primary prevention, ensure survivors' access to protection and justice, empower women to claim their rights, mobilise communities around 'zero tolerance for violence', and respond to the needs and rights of excluded and neglected groups. The Program prioritizes enhanced co-ordination of the state response to crimes against women through a convergence approach that works with government and public systems to reinforce their roles in assuring basic social, civil and economic security.

VIOLENCE AGAINST CHILDREN

SNEHA is starting a new project on 'Ensuring children's safety and well-being by building an ecosystem of non-tolerance to violence against children – a socioecological approach with the involvement of children, parents and community members'. The project will be nested under a flagship program of SNEHA known as SNEHA Centre program. This program is being implemented in 4 clusters of Govandi comprising of approximately 4000 households with a focus on improving the health and nutritional status of children younger than six years of age, women and adolescents. The programme is an integrated family centric model where in women facing domestic violence are supported with counselling, legal and psychological support services. This new initiative will work on two major pillars of intervention: (1) Primary prevention and (2) Comprehensive service-delivery. The primary prevention component will entail community outreach, group-based workshop with children to enable them to talk about difficult issues in their lives, and sessions with parents focusing on efficient parenting and integrating gender socialisation as a part of understanding parenthood. The service-delivery component will entail establishing counselling and mental health services for children undergoing any form of abuse or violence. Mental health interventions will include art-based and play therapy for children to build their confidence and self-expression. The project will interface with government and non-government organisations to build networks and referral mechanisms for addressing issues of abuse and violence against children.

THE PROFILE

The Clinical Psychologist will provide crisis and counselling interventions to children reporting abuse or violence at the counselling centre. The role will involve psychological testing, administration of a battery of tests that help in diagnosis of psychological, personality and clinical disorders. The role entails case work interventions ascertaining the prognosis of the child's situation and defining the intervention plan with reference to counselling and mental health interventions to be followed up. The clinical psychologist requires in-depth knowledge on therapeutic interventions and will work closely with the counselling psychologist for ascertaining the treatment and intervention plan for the child. The incumbent also contributes to the development of the organisation's and program's vision and achievement of its goals.

The foundational requirement for this position is that they are able to show genuine enthusiasm and a sense of caring for the needs of children. They must demonstrate specialised knowledge and possess expertise in the specific issues that a child may face, and know how to deal with them in the most effective manner. They must possess Knowledge of

psychological theory and practice, an ability to relate to and empathize with a range of people, good team working skills, and excellent communication skills, demonstrate sensitive listening and questioning skills.

The Clinical Psychologist will directly report to the Program Coordinator for day-to-day functioning and implementation of the work.
